

Let's Make Snowflakes!

Start with a square of thin paper.

Fold corner-to-corner to make a triangle.

Fold corner-to-corner again to make a smaller triangle.

Fold it in thirds, as best as you can.

Cut off the uneven pieces that are sticking out at a slant.

Cut a triangle out between along the short side of this new triangle.

Begin cutting out small shapes along the edges, being careful not to cut through to the other side. The more little pieces you cut out, the more delicate your snowflake will be.

Now...open it up!
